Chicago Voices

In partnership with the Lyric Opera, CHM celebrated Chicago's storied vocal history and the pioneers who have contributed to Gospel, Classical and Hip-hop music genres through a series of panel conversations, performance interludes and Q&A sessions

We targeted segments of our email distribution lists based on interests, as well as reaching out to partner organizations whose audience base matched our target market for each of our Chicago Voices Talk events.

Social Media

We utilized Facebook to get our message out to our audience as well as that of the Lyric Opera. We also deployed several different versions of sponsored posts and boosted events based on demographic information, interests and specific locations in order to tailor our messages to targeted audiences.

Overall SEO (Search Engine Optimization)

Search Engine Optimization is a methodology of strategies, tactics, and techniques used to increase the number of visitors to a website by obtaining a high-ranking placement in the search results page of a search engine—some of the largest being Google, Bing, and Yahoo.

The industry-standard way of measuring how well a website is ranking or its “strength” is called the SEO domain authority score. Score ranges are translated below.

1-20 | Poor: Domain may be fairly new, or it is not fundamentally sound

21-40 | Competitive: Website is starting to drive traffic, but needs advanced SEO practices

41–50 | Good: Site is receiving good traffic, but should increase blogging consistency

51-70 | Strong: Website is above average, optimized well and is highly recognized

71-80 | Outstanding: Site is on the top of most search engine page results

81-90 | Superior: Site has elite status authority

91-100 | Rare: Site has reached a staple name—Wikipedia, Twitter, Facebook—only a micro-fraction of all sites will ever reach this level.

[Redacted]

[Redacted]

[Redacted] means traffic that comes to a website as a result of unpaid search results, so listings appear on search engine results pages because of their relevance to search terms, as opposed to their being advertisements.
